Environmental Policy & Objectives

As a software development company we recognise that we have a role to play in ensuring that we manage our environmental impacts. We also recognise that we have a role to play in communicating good environmental practice outside our company.

Our environmental policy is based on four goals:

- 1.To continually identify and integrate effective management of environmental issues within our every-day business practices;
- 2.To give full consideration to the management of our key environmental impacts;
- 3.To strive to ensure that environmental improvements go hand-in-hand with reduced costs and increased efficiency; and
- 4.Where appropriate, to use our position as a leading market information company/organisation to promote good environmental practice through our products and services.

Objectives

In fulfilling our environmental policy we have set ourselves the following objectives:

- 1.To ensure that we identify and communicate good environmental practice throughout Sigmer's business
- 2.To regularly review our policy regarding the use of recycled paper within our businesses; and
- 3.To identify and monitor our energy usage with a view to setting reduction targets
